[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Software developer with more than six years of experience building scalable web applications across property, eCommerce, and enterprise software systems.

Technical Skills

JavaScript, TypeScript, React, Next.js, Vue.js, Angular, Node.js, Express.js, Vite, Tailwind CSS, REST APIs, GraphQL, PostgreSQL, Contentful, AWS, Docker, CI/CD, Git, Jest, Vitest

Experience

Software Developer | Sicon | June 2026 – Present

- Design **React** front-end features using **TypeScript** with reusable, component-driven architecture and structured state management in a large-scale application.
- Develop **C#/.NET** back-end APIs, supporting service integration and full-stack feature delivery.
- Collaborate with product owners, developers, and QA engineers to define requirements, refine solutions, and deliver features in an **Agile** environment.
- Contribute to code reviews and debugging, resolving issues across the codebase and **improving performance** through targeted refactoring while maintaining clean, scalable code.

Founder & Software Developer | Greenhouse Web Designs | Apr 2024 – May 2026

- Designed and developed fast, accessible, and responsive websites for clients across industries including non-profit and beauty.
- **Collaborated** with clients to gather requirements and deliver tailored solutions.
- Managed **end-to-end project delivery**, ensuring on-time launches and client satisfaction.

Software Developer | Article | May 2021 – Feb 2024

- Developed **Vue.js** website features to enhance UX and drive growth.
- Led redesign of product page from single to dual column, **increasing conversions by 12%**.
- Built a cross-sell component that generated **\$30K in sales** within the first month of implementation.
- Led performance improvements, **boosting Lighthouse score by 25%** and reducing load times by 8%.
- Developed **React** apps for Contentful, leveraging **GraphQL** for optimized data querying.

Software Developer | SpareRoom | Oct 2019 – Oct 2020

- Extended **RESTful APIs** using **Test-Driven Development** in **Perl** and **Node.js**.
- Developed an **Angular**-based admin frontend and internal tools to improve data access and reporting.
- Integrated and supported payment processing systems by implementing the **Stripe API** in **Node.js**.

Technical Projects

[Mood Tracker App](#) – TypeScript, React, Vite, Tailwind CSS, Motion, Node.js, PostgreSQL

Built a real-time mood tracking app with custom SVG and Lottie animations. Implemented live updates and interactive UI behaviour using WebSockets and REST APIs.

[Client Website](#) – TypeScript, Next.js, Tailwind CSS, next-intl, Motion

Built a multilingual website for an animal rescue organisation using Next.js and Tailwind CSS. Includes language localisation with next-intl, site performance optimisation, and a donation system.

[Ice Cream Inventory App](#) – TypeScript, Angular, Tailwind CSS, C#, .NET, PostgreSQL

Developed an inventory app for creating, updating and tracking products, stock levels and sales. Implemented a dashboard with low-stock alerts and top-selling insights to support inventory tracking.

Education

Northcoders – Full-Stack Bootcamp (2019)

Leeds Beckett University — Bachelor of Arts in Media Studies, Honours (2012)
